INSA SN Bose Research Professorship on Prof. Raghavendra Gadagkar

Citation

The Indian National Science Academy has awarded Prof. Raghavendra Gadagkar of the Centre for Ecological Sciences and Centre for Contemporary Studies, IISc, Bangalore, their SN Bose Research Professorship which is, in the words of the President of the Academy, "one of the highest honours that the Academy confers". Professor Gadagkar has accepted this Professorship from 1st January 2010 for a period of five years and will continue to work at the Indian Institute of Science, Bangalore. The Professorship is named after the famous Indian Physicist Satyendra Nath Bose (1894-1974), best known for his work on quantum mechanics, Bose-Einstein Statistics and Bose-Einstein Condensate. Incidentally, the subatomic particle "boson" is named after Bose and Einstein.
